

The logo for EAMOT features the word "EAMOT" in a bold, dark teal, sans-serif font. The letter "T" is stylized with a red top bar, a white vertical stem, and an orange bottom bar. The background consists of a light gray hexagonal pattern on a white background.

**EAMOT**

**POWERED BY IOT,  
BACKED BY EXPERIENCE**

**Operations & Maintenance of DG sites**

# Operations & Maintenance of DG sites

At EAMOT, we specialize in managing operations and maintenance of DG sites with a strong focus on training and upskilling our technicians. We understand that skilled technicians are crucial for efficient and reliable operations. Therefore, we invest in comprehensive training programs to enhance their technical knowledge and expertise.

Service quality is at the core of our operations. We have stringent quality control measures in place to maintain high standards in service delivery. From regular inspections to preventive maintenance, we follow a systematic approach to identify and address issues promptly, minimizing downtime and optimizing the performance of DG sites.

## Focus on skills and training of technicians

At EAMOT, we prioritize the skills and training of our technicians on the ground team. We invest in continuous development to enhance their expertise, enabling them to deliver exceptional service and handle complex technical challenges.

## Service Quality

What sets EAMOT apart is our unwavering commitment to service quality. We go the extra mile to exceed client expectations through our attention to detail, prompt response times, and proactive approach to maintenance, ensuring maximum uptime and customer satisfaction.

## Report & Returns

As part of our commitment to transparency, EAMOT provides comprehensive reports and returns to clients, showcasing the operational efficiency and effectiveness of their DG Sets, Servo Stabilizers, and UPS systems. We believe in keeping our clients well-informed to make informed decisions regarding their energy management strategies.

## Controls & Quality

EAMOT emphasizes strict controls and quality in service delivery. We adhere to rigorous processes and standards to ensure consistent and reliable performance, resulting in optimized equipment functionality and minimized downtime.

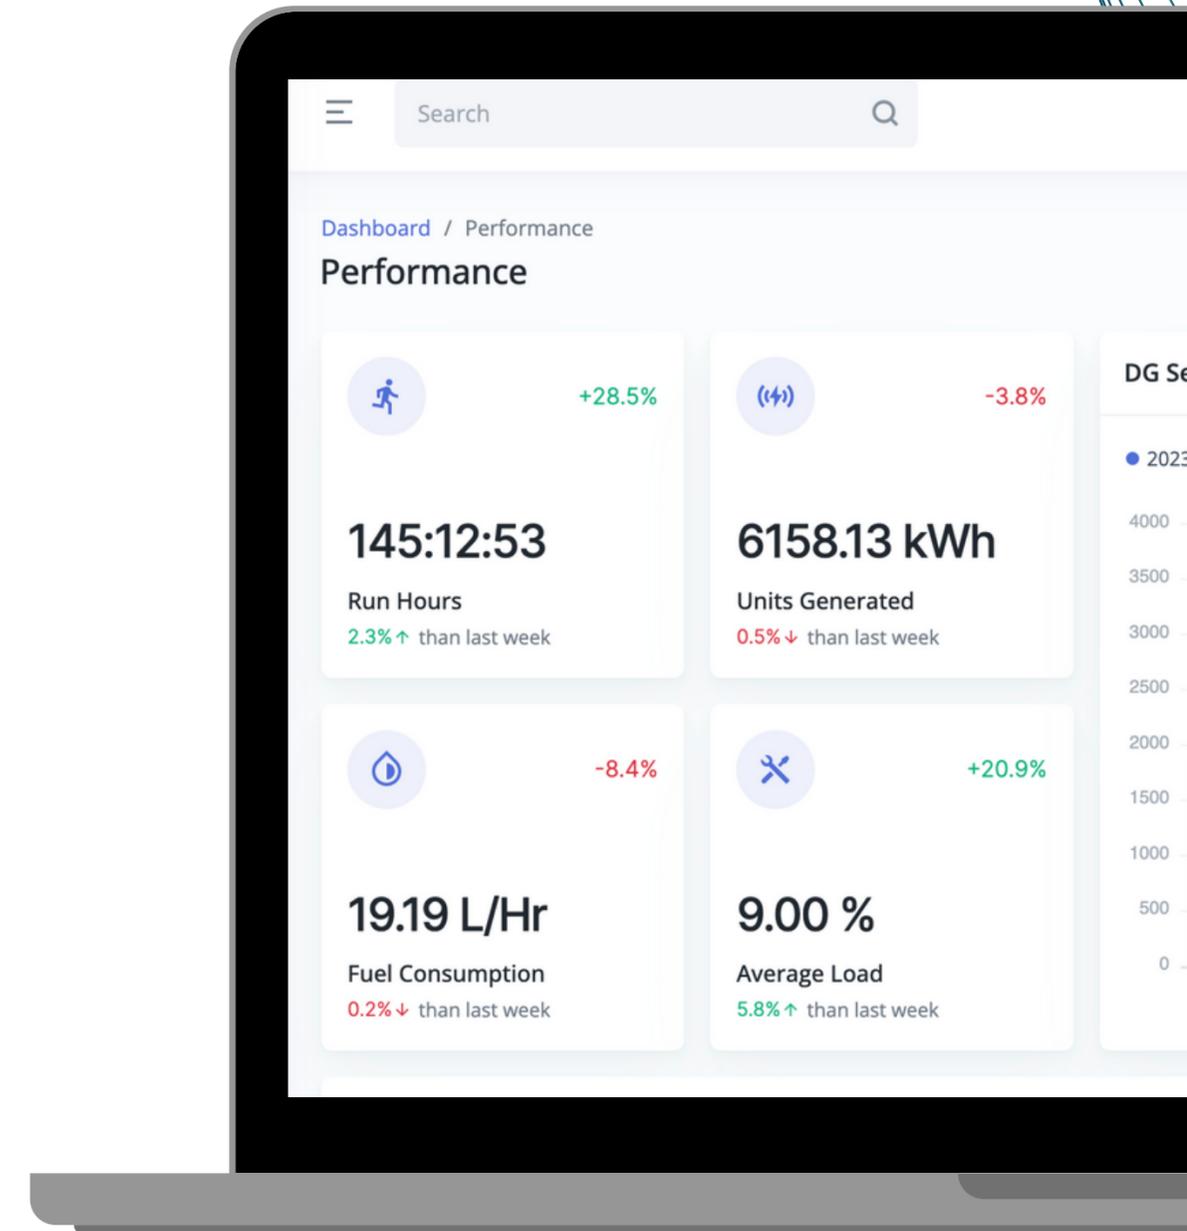

## Various Tech Tools & Process adhered

Leveraging various tech tools and processes, EAMOT stays at the forefront of industry advancements. We incorporate cutting-edge technologies and software solutions to streamline operations, enhance diagnostics, and facilitate efficient maintenance procedures.

## Compliances Adherence

EAMOT understands the importance of compliance. We ensure adherence to all necessary compliances, including manpower regulations (HR), statutory requirements, and medical standards. By prioritizing compliance, we provide a safe and reliable service environment for both our clients and our workforce.

# Focus on Technology

IoT integration allows us to gather valuable insights into energy consumption patterns, load management, and performance optimization. By utilizing this data, we can implement energy-saving measures, optimize fuel consumption, and drive overall operational efficiency.

Through our holistic approach to operations and maintenance, which includes comprehensive technician training, a focus on service quality, and integration of IoT technology, we ensure that DG sites under our management operate at their peak performance levels, minimizing downtime, and maximizing reliability for our clients.

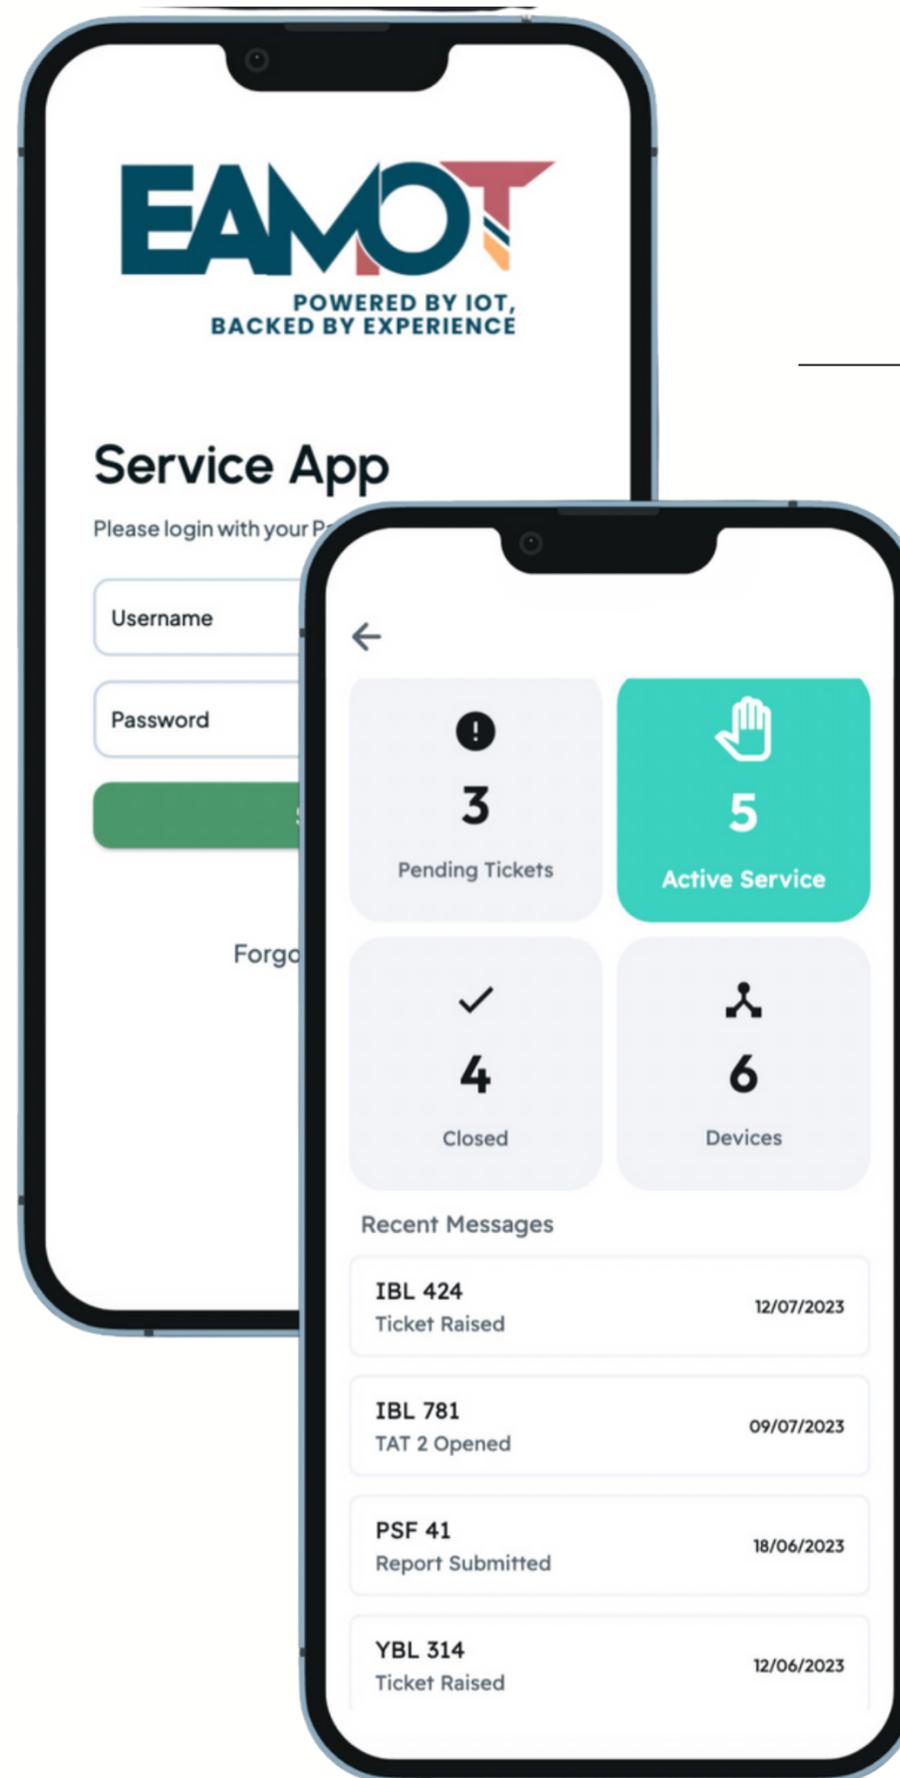

# Features

## Real time estimates of Service and Parts

- Channel Partner Dashboard
- Inventory Mapping
- Scaling with Tech and Partners

## Dedicated SPOC and Technician

- TAT1 and TAT2 Calculation
- Comments by on Ground Staff
- Reminders of Preventative Maintenance

## ● Service App for Engineer

Holistic Tracking of each complaint, service (scheduled and requested) with Visual Reports

## ● Dashboard

EAMOT uses Service CRM as a internal productive tool for managing our response to each ticket raised

## ● Transparency of Work and Report

Real time reports for client about DG, Stabiliser Servicing. NLP on comments will highlight key comments by technicians and engineers.

# Our Services

We specialize in providing cutting-edge technology solutions that help businesses and organizations monitor and manage their energy usage more efficiently and effectively.-

## IoT and AMC Services

IoT-enabled monitoring solutions for diesel generators

Energy auditing and consulting services

Sustainable energy solutions

Predictive maintenance services

Customized energy management solutions

AMC & Allied Services

## Consulting services

EAMOT provides energy auditing and consulting services to help organizations identify areas for improvement in their energy management practices.

Our team of experts conducts detailed assessments and provides actionable recommendations for energy optimization and cost savings.

## Sustainable Energy Solutions

Our retrofit emission control devices reduce emissions from diesel generators and are compliant with environmental regulations.

Our dual fuel kits enable diesel generators to operate on a combination of diesel and natural gas, reducing fuel costs and emissions.

Our lithium-ion battery solutions provide reliable and efficient energy storage, enabling our clients to reduce their reliance on fossil fuels and minimize their environmental impact.
